

Login Page

The screenshot shows a web browser window with the URL `localhost:8080/login.php`. The page has a purple header bar with several tabs and a search bar. The main content area is white and contains a "Login Form" section. The form has two input fields: "Email" and "Password". Below the "Password" field is a green "Login" button. At the bottom left is a red "Cancel" button, and at the bottom right is a link "New User? [Create Account](#)".

New User? [Create Account](#)

The users have to enter credentials if they want to make any changes to the blogs(edit,delete or create). This page also has create Account, which redirects to the registration page. I haven't included the header here.

Registration Page

The screenshot shows a web browser window with the URL `localhost:8080/register.php`. The page has a purple header bar with several tabs and a search bar. The main content area is white and contains a "Register" section. The section starts with the text "Please fill in this form to create an account." followed by four input fields: "Email", "Full Name", "Password", and "Repeat Password". Below these fields is a green "Register" button. At the bottom left is a link "Already have an account? [Sign In](#)".

This page shows a list of blogs with the author details and creation date. I have also added the pagination for the blogs. Each page can contain 4 blogs. We can modify this in the code.

Single Blog

This page contains a description of 6500 characters (we can modify the count in the database). It also contains the author details, Author Id is shown only to the admins. Edit and delete buttons will only be visible for the admin and the user who created the blog. On click of delete, it shows a prompt to be sure.

Twitter	Another good way to find bloggers is to search in their preferred social network. Twitter is a popular platform among bloggers as they use it to share their content and engage with their community. There are three ways to find relevant bloggers. Easiest way is to again search for them through the Twitter search. Search for "beauty blogger" in the category accounts and you will find all profiles that feature the search term in their bio. With advanced search you can further refine the list by adding a search place. The second option is to look for relevant bloggers among the accounts followed by a blogger that you already know. With +1k followers, this task can become quite time consuming task. If you scroll down to the end of the list you can however use STRG+F to search the site. Finally, there are Twitter profiles like UK Blogger RT, that are dedicated to sharing blog posts.	2023-02-25 21:00:36
Computer Network	Computer Network tutorial provides basic and advanced concepts of Data Communication & Networks (DCN). Our Computer Networking Tutorial is designed for beginners and professionals. Our Computer Network tutorial includes all topics of Computer Network such as introduction, features, types of computer network, architecture, hardware, software, internet, intranet, website, LAN, WAN, etc.	2023-02-25 21:03:47

This is my blog page. It shows the list of blogs added by the user who is currently loggedIn.

Manage Users

User id	User name	Email	is Admin	Created date	Edit
20	alex	alex@gmail.com	false	2023-02-25 20:45:33	Edit Delete
21	rohan	rohan@gmail.com	false	2023-02-25 20:45:50	Edit Delete
22	santhosh	yennamsanthosh82@gmail.com	false	2023-02-25 20:46:12	Edit Delete
23	sandy	sandysanthosh045@gmail.com	false	2023-02-25 20:46:28	Edit Delete

This page contains information about all the users with edit and delete buttons.

This page is accessible only to the admins. The url will be redirected to the index page if the user doesn't have authorization to access this page.

Edit User

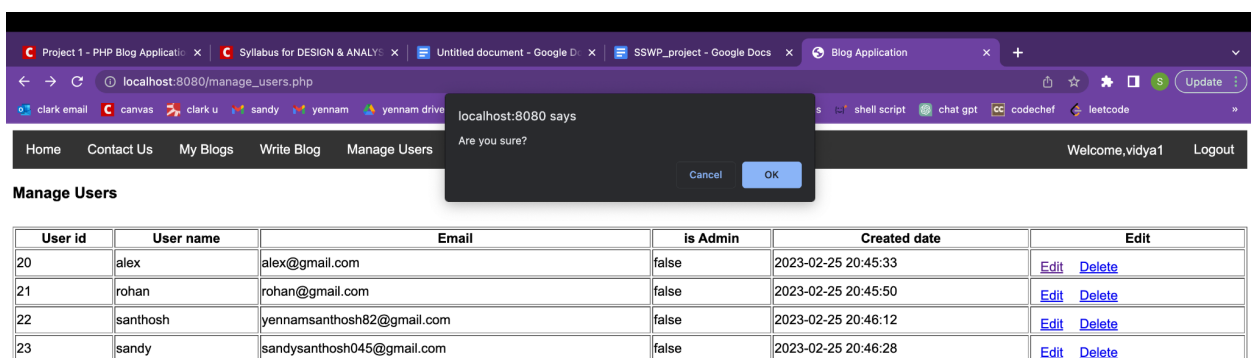

The screenshot shows a web browser window with the URL `localhost:8080/manage_users.php?id=20&edit=true`. The page has a navigation bar with links: Home, Contact Us, My Blogs, Write Blog, Manage Users, and a user profile section with 'Welcome, vidya1' and a 'Logout' link. The main content area is titled 'Update user' and contains the following form fields:

- Email**:
- Full Name**:
- Password**:
- Admin**:

At the bottom of the form is a green button labeled 'Update'.

This page will be opened if the admin clicks on the edit button in `manage_users` page. There are a list of options which an admin can change.

Delete User

The screenshot shows the 'Manage Users' page with a table of users. A confirmation dialog box is open over the table, asking 'Are you sure?' with 'Cancel' and 'OK' buttons. The table has the following data:

User id	User name	Email	is Admin	Created date	Edit
20	alex	alex@gmail.com	false	2023-02-25 20:45:33	Edit Delete
21	rohan	rohan@gmail.com	false	2023-02-25 20:45:50	Edit Delete
22	santhosh	yennamsanthosh82@gmail.com	false	2023-02-25 20:46:12	Edit Delete
23	sandy	sandysanthosh045@gmail.com	false	2023-02-25 20:46:28	Edit Delete

If the admin clicks on the delete button for any user, it opens a prompt to verify it once again. I can also add a feature for adding a new user in this `manage_users` page.

If the user is not logged In, I'm showing the header with only Home and Contact us pages.

In total, I have added extra features which are not mentioned in the question such as pagination, manage users page for admin, contact us page if user has queries like unable to register or something else, showing “My Blogs” page, redirection to index page if a particular user doesn’t have permissions for a page.
